**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5, 6, 8-13, and 20-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Carlson (US 3,694,596).

Carlson discloses a manually engageable control lever device for vehicles having handlebar-type steering that includes at least one handle grip and structure for mounting said device, said device comprising: a main body (20) including a readily manually engageable distal end and a mounting end (see Fig 3), a central portion extending therebetween (see Fig 3), said mounting end including first and second spaced wings (see Fig 4) and an actuator connecting structure (see Fig 5), said wings adapted to receive means thereat for pivotably mounting said main body at the structure and adjacent to the handle grip (see Fig 3); and at least a first flare extending from said central portion of said main body and adapted for secure engagement by either a user's finger or thumb to cause movement from a variety of user hand positions or angles at the handle grip once said main body is mounted (see Fig 3), said main body and said first flare configured relative to each other so that said flare is oriented convergently relative to the handle grip once said main body is mounted, with a

substantial but variable space defined between said flare and the handle grip during operation of said device (see Fig 4), a pivot (32).

Re claim 2, said main body includes a second flare extending from said central portion of said main body opposite said central portion from said first flare and adapted for secure engagement by either a user's finger or thumb to cause movement (see Fig 2).

Re claim 3, wherein said first flare has a length and wherein said main body has an overall length exceeding said length of said first flare (see Fig 3).

Re claim 5, both of said flares and distal end of said main body are adapted for selective manual engagement to cause lever movement (see Fig 3).

Re claim 6, said first flare of said main body defines a surface area characteristic including a digitally engageable cradle and a digitally engagable extension surface (see Fig 3).

Re claim 8, said actuator connecting structure of said mounting end of said main body is elevated relative to said first and second wings, said distal end and said first flare (see

Fig 1)

***Response to Arguments***

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
